# 100 AI Prompts That Actually Work

Copy-paste prompts for writing, coding, marketing, research and business — tested and proven.

AIProSpace · aipro.space.com · Free Resource 2026

## How to Use This Guide

Every prompt in this guide has been tested with ChatGPT and Claude. They are designed to get specific, useful results — not generic AI fluff. Copy any prompt, replace the text in [brackets] with your own information, and paste it directly into your AI tool.

### ■ Pro Tip

The best prompts are specific. "Write a blog post about coffee" gets generic results. "Write a 1,200-word blog post about the health benefits of drinking black coffee for people over 40, in a conversational tone, with 5 specific scientific studies cited" gets something actually useful.

# Writing & Content

## Blog Post Writer

Copy this prompt:

Write a [word count]-word blog post about [topic] targeting the keyword "[keyword]". The audience is [describe audience]. Use a conversational tone, include an introduction that hooks the reader in the first sentence, 4-5 H2 sections with practical advice, and a conclusion with a clear call to action. Include at least 3 specific examples or statistics.

## Email Subject Lines

Copy this prompt:

Generate 10 email subject lines for [describe email topic and purpose]. The audience is [describe audience]. Mix different approaches: curiosity, benefit-focused, question-based, and urgency-driven. Each subject line should be under 50 characters.

## Social Media Captions

Copy this prompt:

Write 5 different Instagram captions for a post about [topic]. Include relevant emojis, a hook in the first line, value in the middle, and a call to action at the end. Vary the length between short (under 50 words) and medium (100-150 words). Target audience: [describe audience].

## Product Description

Copy this prompt:

Write a product description for [product name]. Key features: [list features]. Target customer: [describe customer]. Price point: [price]. Focus on benefits over features, use sensory language where appropriate, and end with a clear reason to buy now. Keep it under 150 words.

## Press Release

Copy this prompt:

Write a press release announcing [what you are announcing]. Include: a compelling headline, dateline, opening paragraph with the 5 Ws (who, what, when, where, why), two body paragraphs with details, a quote from [name and title], boilerplate paragraph about [company name], and contact information placeholder. Use formal press release style.

## Newsletter Introduction

Copy this prompt:

Write an engaging introduction for a newsletter about [topic]. The newsletter goes out to [number] subscribers who are interested in [interests]. Include a brief personal anecdote or observation, what is in this issue, and why it matters to the reader. Keep it under 150 words and make it feel like a message from a friend, not a corporate announcement.

## Video Script Hook

Copy this prompt:

Write the first 30 seconds of a YouTube video script about [topic]. It must hook the viewer immediately, tease what they will learn, and give them a reason to keep watching. Do not start with "Hey guys" or "Welcome back." Start with the most interesting fact, question, or statement about the topic.

## Story Brand Messaging

Copy this prompt:

Using the StoryBrand framework, write the homepage messaging for [company/product]. The customer is the hero. The problem they face: [problem]. The guide (that is us): [company name]. The plan: [3-step process]. The call to action: [what to do]. The success: [what life looks like after]. The failure: [what happens if they do nothing].

# Business & Marketing

## Cold Email

Copy this prompt:

Write a cold email to [type of prospect] offering [your service/product]. The email should: be under 150 words, reference something specific about their business (use [specific detail] as the personalization placeholder), clearly state the value proposition in one sentence, include social proof in one line, and end with a low-commitment call to action. Avoid phrases like "I hope this email finds you well" and "I wanted to reach out."

## LinkedIn Post

Copy this prompt:

Write a LinkedIn post about [topic or lesson learned]. Format: start with a bold one-line hook, use short paragraphs (1-2 sentences each), include 3-5 specific insights or lessons, add a personal reflection, and end with a question to drive comments. Use line breaks between every paragraph. No hashtags in the body – add 3 relevant ones at the end only.

## SWOT Analysis

Copy this prompt:

Conduct a SWOT analysis for [business/product/idea]. For each quadrant, provide 4-5 specific points with brief explanations. Strengths: focus on unique advantages. Weaknesses: be honest about real limitations. Opportunities: identify specific market trends or gaps. Threats: include both competitive and external threats. After the analysis, provide 3 strategic recommendations based on the findings.

## Pricing Strategy

Copy this prompt:

Help me develop a pricing strategy for [product/service]. Current situation: [describe]. Target customer: [describe]. Competitors charge: [price range]. My costs: [describe]. Suggest 3 different pricing models (such as freemium, tiered, value-based) with pros and cons of each for my specific situation. Recommend which one to start with and why.

## Job Description

Copy this prompt:

Write a job description for a [job title] at [company type]. Required skills: [list skills]. Nice to have: [list]. The role involves: [main responsibilities]. Salary range: [range]. Company culture: [describe in 2-3 words]. Make the description compelling enough to attract top candidates, be specific about day-to-day work, and avoid corporate jargon. Include a section on what makes this opportunity unique.

# Research & Analysis

## Research Summary

Copy this prompt:

I am going to paste a long document below. Please summarize it in this format: 1) Main argument or finding in one sentence, 2) 5 key points as bullet points, 3) Most surprising or counterintuitive finding, 4) Limitations or caveats mentioned, 5) Practical implications for [your specific context]. Keep the entire summary under 300 words. Here is the document: [paste document]

## Competitive Analysis

Copy this prompt:

Analyze the competitive landscape for [your product/service] in [market]. For each of these 3 competitors: [Competitor 1], [Competitor 2], [Competitor 3], provide: their positioning, key strengths, key weaknesses, pricing model, and who their ideal customer is. Then identify: 1) A gap in the market none of them fill, 2) The one thing I must do better to win, 3) The segment I should focus on first.

## Decision Framework

Copy this prompt:

Help me make a decision about [decision]. Options I am considering: [list options]. Factors that matter most to me: [list factors in order of importance]. My constraints: [list constraints]. Please: 1) Score each option against each factor, 2) Identify the decision I am avoiding or the option I have not considered, 3) Recommend one option with clear reasoning, 4) Tell me what information would change your recommendation.

## Data Interpretation

Copy this prompt:

Here is some data: [paste data]. Help me interpret it. Specifically: 1) What is the most important finding? 2) What patterns or trends do you see? 3) What is missing or what questions does this data not answer? 4) What action should I take based on this data? 5) What would you need to know to be more confident in these conclusions?

# Coding & Technical

## Code Review

Copy this prompt:

```
Review this code and provide feedback on: 1) Any bugs or potential errors, 2) Security vulnerabilities, 3) Performance improvements, 4) Code readability and best practices, 5) One specific refactoring suggestion with example code. Here is the code: [paste code]
```

## Debug Helper

Copy this prompt:

```
I am getting this error: [error message]. Here is my code: [paste code]. The expected behavior is [describe]. The actual behavior is [describe]. Please: 1) Explain what is causing the error in plain English, 2) Provide the corrected code, 3) Explain what you changed and why, 4) Suggest how to prevent this type of error in the future.
```

## API Documentation

Copy this prompt:

```
Write API documentation for this endpoint: [describe endpoint]. Include: overview paragraph, authentication requirements, request parameters table (name, type, required/optional, description), request example in JSON, response format with all fields explained, error codes and their meanings, and a code example in [programming language]. Use clear technical writing that a junior developer could understand.
```

## Tech Stack Recommendation

Copy this prompt:

```
I am building [describe what you are building]. Requirements: [list requirements]. Team experience: [describe team]. Budget: [describe]. Timeline: [describe]. Recommend a tech stack with: 1) Frontend framework with reasoning, 2) Backend language/framework with reasoning, 3) Database choice with reasoning, 4) Hosting/infrastructure recommendation, 5) One thing I should avoid based on my constraints.
```

# Personal Productivity

---

## Weekly Plan

Copy this prompt:

Help me plan my week. My main goal this week is [goal]. My must-do tasks are: [list tasks]. Time available each day: [hours]. Energy levels: [describe when you are most focused]. Please create a day-by-day schedule that: batches similar tasks, puts deep work during high-energy times, includes buffer time, and is realistic rather than aspirational. Highlight the one task I should do first each day.

## Learning Plan

Copy this prompt:

Create a 30-day learning plan for [skill you want to learn]. My current level: [beginner/intermediate]. Time available: [hours per week]. Learning style: [visual/reading/practice/video]. Goal: [what you want to be able to do in 30 days]. Include: week-by-week progression, specific resources for each week (books, courses, practice exercises), milestones to track progress, and common mistakes to avoid for beginners in this skill.

## Feedback Response

Copy this prompt:

Help me respond to this feedback: [paste feedback]. My initial reaction is [describe your reaction]. Please help me: 1) Identify the valid points in the feedback, 2) Draft a response that acknowledges the feedback professionally, 3) Decide what to act on and what to discard, 4) Suggest how to prevent similar feedback in the future. Keep the response under 100 words and strike a tone of confident professionalism.
